PROFESSIONAL SUMMARY

Data Scientist with 3+ years of experience transitioned into an AI Engineer role specialized in LLMs, RAG, and multi-agent architectures. Expert in building scalable Fast API backends and deploying robust AI solutions on AWS to automate enterprise workflows. Proven track record of combining traditional machine learning with modern generative AI to solve complex business problems.

TECHNICAL SKILLS

- **AI/ML:** LLMs, RAG, AI Agents, Prompt Engineering, Embeddings, Semantic Search.
- **Frameworks:** Fast API, Lang Chain, Lang Graph, Crew AI, Pydantic, Scikit-learn.
- **Tools:** Python, SQL, AWS (Lambda, S3), Docker, PostgreSQL, Chroma DB.

PROFESSIONAL EXPERIENCE

AI Engineer (formerly Data Scientist) | *Cynosure Software Solutions* | 2021 – Present

- **Transition to GenAI**: Led the shift from traditional data modelling to developing end-to-end LLM applications and multi-agent systems, reducing manual operational effort by 60%+.
- **System Engineering:** Developed scalable Fast API microservices for real-time AI inference and RAG pipelines, reducing retrieval latency by approximately 35%.
- **Cloud Deployment**: Managed the full lifecycle of AI models on AWS (Lambda, API Gateway, S3) with automated monitoring and logging via CloudWatch.

Professional Development & Internships | 2019 – 2021

- **AI & Data Science Specialization**: Completed 10 months of intensive coursework covering Python, Data Analytics, and AI/ML foundations.
- **Data Science Internships**: Completed 5 months across two internships focusing on data analysis and applied machine learning.

KEY PROJECTS

Multi-Agent SQL Copilot API

- Built a multi-agent AI system that converts natural language into optimized SQL queries.
- Designed specialized agents for query generation and validation using Fast API and SQLite.

Enterprise RAG Assistant

- Created a production-ready AI assistant for enterprise-level document search and knowledge retrieval.
- Designed the full pipeline from data ingestion to vector storage using Lang Chain and Chroma DB.

Loan Approval Prediction System

- Developed an end-to-end ML pipeline to predict loan eligibility using real-world applicant data.
- Integrated a Flask-based REST API with a Stream lit interface for real-time model predictions.

EDUCATION

Bachelor of Science in Computer Science | *VSK University* | **2019**
